mobile: +31.0.615291513 • Amsterdam, Netherlands • tcheiner@gmail.com

FOUNDING ENGINEER

Two Decades of Tech Expertise: Extensive experience in corporate banking, security/compliance, and backend development in efficient, functional technical and product teams.

Career Aspirations: Seeking growth and cultural fit.

Proven Track Record: Successful delivery of critical, platform-migrations, production-ready deployments in high-stakes environments for globally recognized organizations.

Hands-On Developer: Expertise in enterprise-grade platforms across finance, healthcare, and gaming sectors.

Skilled Project Manager: Good interpersonal skills, mentoring up and coming development teams, consistently driving projects to meet milestones, optimizing operational processes to enable streamlined cross-department collaboration.

Vertical Integration: Adept at managing tasks and projects across all organizational levels—from executives to junior contributors and cross-functional teams—ensuring alignment and delivering desired results.

TECHNOLOGY SKILLS:

Languages: Python, React, TypeScript, Java (J2EE/JSP), SQL, CSS, HTML, JSON, XML/XSL, Swift, JavaScript, Kotlin, C/C++, ASP, VBScript

Frameworks/Standards: REST, SOAP, Spring MVC, Hibernate, JSP, JDBC, JUnit, TestNG, httpUnit

IaC: Docker, Terraform, OpenTofu

Servers/Platform: Unix/Linux/Solaris, Apache, MacOS, Windows, VAX/VMS

Databases: AWS Dynamo, Redis, Postgres, Oracle, MySQL, Supabase, Firebase, Chroma

Cloud Technologies:

AWS Ecosystem: EC2, CloudFormation, Amplify, SNS, SES, Lambda, CloudFront, S3, DynamoDB, API Gateway, CloudWatch, ECS, RDS, CLI

Azure Ecosystem: Azure Functions, SQL Database, Postgres DB.

Tools: Visual Studio Code, IntelliJ, Eclipse/STS, GitHub/Git, iLog, Confluence, JIRA, GitHub Actions, Docker, XMLSpy, UML Enterprise Architect, Splunk, Tableau

Portfolio: tcheiner.com

PROFESSIONAL EXPERIENCE:

Personal Leave

Amsterdam, Netherlands

October 2024 - Present

- Consulted for several (6) early stage startups to determine viability.
- Worked on a few personal passion projects:
 - Implementation of a customized chatbot that builds a FAISS store of portfolio contents as a knowledge base
 - Implementation of a reddit crawler to analyze reddit boards for analysis sentiment, product and market analysis for a stealth startup to target current trends and market
 - UI interface and cloud solution for an SaaS servicing corporations requiring single tenant architecture and air gapped deployment.

ManaBurn

Saratoga, CA

Founding/Product Engineer

Jun 2023 – October 2024

- Authored comprehensive Technical Design Documents for VC presentations and detailed system design documentation for efficient knowledge transfer.
- Architected and developed a robust backend infrastructure for an AI-driven gaming platform hosted on AWS, contributing to the success of an innovative startup in the RPG sector.
- Collaborated with Technical Artists and Mobile Developers to design and implement tools and workflows that streamlined cross-department collaboration. Established processes to ensure art assets could be updated independently without disrupting backend systems or mobile app development, enabling seamless and efficient workflows across teams.
- Created and deployed a scalable backend solution using Python and FastAPI, leveraging AWS services such as EC2, Lambda, S3, CloudFront, Simple Email Service, Simple Notification Service, API Gateway (HTTP/REST APIs) and DynamoDB. This included integration with OpenAI and the implementation of strategies to optimize prompts, cost, and latency for both OpenAI and Stable Diffusion on AWS.
- Managed cloud costs effectively by designing systems that optimized the use of available resources, ensuring cost-efficiency without compromising performance.
- Spearheaded the development of a spinoff product within the Google Accelerator program, enabling users to seamlessly create game assets through a user-friendly UI frontend and backend integration. Utilized technologies including TypeScript, React, CSS and Python.

MyndSens

Paris, France

Founding Engineer

July - Dec 2022

- Conceptualized and executed the development of a prototype Android application for an innovative healthcare sensor, bringing to life a decade-long research project by a leading researcher on brain function aimed at enhancing focus and effective working periods
- Encompassed UX design and hands-on coding using Kotlin, Room Database, and Bluetooth Low Energy (BLE) libraries
- Product is scheduled for release in July 2024

Wells Fargo Bank

San Francisco, CA

2018 – 2020 Tech Lead/Manager

2004-2020

- Spearheaded production support for diverse range of products ensuring seamless operational continuity.
- Expertly analyzed and resolved real-time escalation issues, enhancing platform reliability and user satisfaction.
- Developed customized Splunk analytics dashboards for targeted post production monitoring, and customer analytics for product, performance and traffic throughput analysis.
- Acted as primary liaison for dev team for all production related concerns, including recommendations on how to structure code for security, conformity and platform stability
- Applied in-depth domain expertise to identify, root out systemic root causes of production issues, mitigating and eliminating recurrence rates.
- Navigated complex corporate structures to drive issue resolution, fostering collaboration and accountability among stakeholders.

2012 — 2018 Team Tech Lead

- Directed the successful delivery of up to 5 concurrent high-impact projects per release cycle, with budgets ranging from \$10k-900k and durations spanning 3-9 months.
- Fostered professional growth through mentoring, code reviews, and leading knowledge/training sessions for both full-time and contract developers.
- Managed small, agile teams, orchestrating project activities and ensuring all deliverable were completed on schedule and within budget.
- Oversaw the entire project lifecycle, including resource acquisition/allocation/management, cost planning, and architecture design, while actively engaging with cross departments for feedback and coordination.
- Championed backend project initiatives from proof of concept through intensive integration testing, delivering robust solution that consistently met corporate object objectives,

2008 — 2012 Senior Engineer

- Orchestrated and steered majored backend and internal software dev initiatives, significantly enhancing operational efficiency
- Pioneered integration projects that were rolled out platform-wide
Engineered a bespoke analytics platform, incorporating dynamic PDF generation for stored applications, bolstering data visualizations through analytics capabilities.
- Designed and implemented comprehensive unit and functional testing frameworks to ensure the robustness and reliability of software solutions.
- Successfully transitioned software dev processes to an offshore team based in India, optimizing resource allocation and project scalability.
- Conducted comprehensive training for the offshore team, enhancing their expertise in our product suite and dev practices.
- Adapted to and managed dual time zone schedules between US and India, pioneering round the clock productivity and seamless collaboration for our dev team.

2004 — 2008 Software Engineer

- Engineered and refined tools for the enhancement of internal backend infrastructure, driving efficiency.
- Led the maintenance and support of backend systems, ensuring stability and performance through continuous release coordination. Orchestrated project timelines and release requirements, aligning cross-departmental efforts with release management, content management, development and QA teams.

EDUCATION:

University of Missouri, Kansas City, United States Of America
Bachelor of Science in Computer Science
Emphasis in Software Engineering
